

What is Lounge Pal?

- Lounge Pal is a mobile application designed to enhance the lounge experience for travelers during their layovers at airports.
- It provides users with seamless access to online menus of food options available in airport lounges, allowing them to make informed choices that cater to their preferences and dietary requirements.
- Additionally, Lounge Pal offers features such as personalized recommendations, filtering options, and the ability to book lounges, ensuring that users have a convenient and enjoyable dining experience while waiting for their flights.
- The app aims to create a user-centric and inclusive environment where travelers can easily navigate through lounge services, discover new culinary delights, and make the most of their time in airports.
